

MEMBUAT TABLE DAN MODEL

1. Buat file baru di dalam folder views, beri nama makanan.blade.php

2. Lalu tuliskan CUT bagian script menu makanan yang ada di dalam file [home.blade.php](#), dan paste kedalam file bernama makanan.blade.php seperti pada gambar

```
<section class="section" id="menu">
  <div class="container">
    <div class="row">
      <div class="col-lg-4">
        <div class="section-heading">
          <h6>Our Menu</h6>
          <h2>Our selection of cakes with quality taste</h2>
        </div>
      </div>
    </div>
  </div>
  <div class="menu-item-carousel">
    <div class="col-lg-12">
      <div class="owl-menu-item owl-carousel">
        <div class="item">
          <div class="card card1">
            <div class="price"><h6>$14</h6></div>
            <div class="info">
              <h1 class="title">Chocolate Cake</h1>
              <p class="description">Lorem ipsum dolor sit amet, consectetur adipiscing elit, sedii do eiusmod teme.</p>
              <div class="main-text-button">
                <div class="scroll-to-section"><a href="#reservation">Make Reservation
                  <i class="fa fa-angle-down"></i></a></div>
              </div>
            </div>
          </div>
        </div>
      </div>
    </div>
  </div>
```

```

29     <div class="item">
30         <div class='card card2'>
31             <div class="price"><h6>$22</h6></div>
32             <div class='info'>
33                 <h1 class='title'>Klassy Pancake</h1>
34                 <p class='description'>Lorem ipsum dolor sit amet, consectetur adipiscing elit, sedii do eiusmod teme.</p>
35                 <div class="main-text-button">
36                     <div class="scroll-to-section"><a href="#reservation">Make Reservation
37                         <i class="fa fa-angle-down"></i></a></div>
38                     </div>
39                 </div>
40             </div>
41         </div>
42     <div class="item">
43         <div class='card card3'>
44             <div class="price"><h6>$18</h6></div>
45             <div class='info'>
46                 <h1 class='title'>Tall Klassy Bread</h1>
47                 <p class='description'>Lorem ipsum dolor sit amet, consectetur adipiscing elit, sedii do eiusmod teme.</p>
48                 <div class="main-text-button">
49                     <div class="scroll-to-section"><a href="#reservation">Make Reservation
50                         <i class="fa fa-angle-down"></i></a></div>
51                     </div>
52                 </div>
53             </div>
54         </div>
55     <div class="item">
56         <div class='card card4'>
57             <div class="price"><h6>$10</h6></div>
58             <div class='info'>
59                 <h1 class='title'>Blueberry CheeseCake</h1>
60                 <p class='description'>Lorem ipsum dolor sit amet, consectetur adipiscing elit, sedii do eiusmod teme.</p>
61                 <div class="main-text-button">
62                     <div class="scroll-to-section"><a href="#reservation">Make Reservation
63                         <i class="fa fa-angle-down"></i></a></div>
64                     </div>
65                 </div>
66             </div>
67         </div>
68     <div class="item">
69         <div class='card card5'>
70             <div class="price"><h6>$8.50</h6></div>
71             <div class='info'>
72                 <h1 class='title'>Klassy Cup Cake</h1>
73                 <p class='description'>Lorem ipsum dolor sit amet, consectetur adipiscing elit, sedii do eiusmod teme.</p>
74                 <div class="main-text-button">
75                     <div class="scroll-to-section"><a href="#reservation">Make Reservation <i class="fa fa-angle-down">
76                         </i></a></div>
77                     </div>
78                 </div>
79             </div>
80         </div>
81     <div class="item">
82         <div class='card card3'>
83             <div class="price"><h6>$7.25</h6></div>
84             <div class='info'>
85                 <h1 class='title'>Klassic Cake</h1>
86                 <p class='description'>Lorem ipsum dolor sit amet, consectetur adipiscing elit, sedii do eiusmod teme.</p>
87                 <div class="main-text-button">
88                     <div class="scroll-to-section"><a href="#reservation">Make Reservation
89                         <i class="fa fa-angle-down"></i></a></div>
90                     </div>
91                 </div>
92             </div>
93         </div>
94     </div>
95 </section>

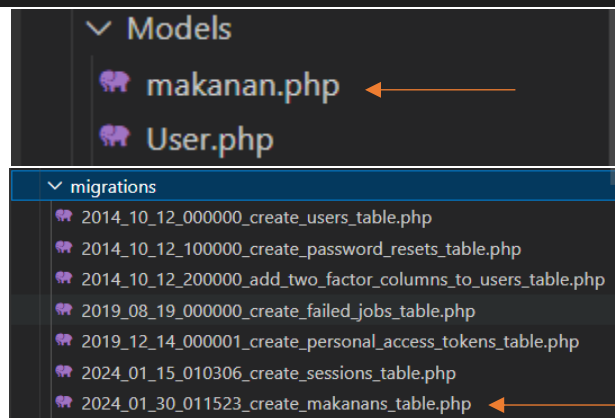

```

3. Sekarang kita tuliskan script seperti di bawah pada [home.balde.php](#)

```
resources > views > home.blade.php > html > body
192         <a rel="nofollow" href="http://youtube.com"><i class="fa fa-play"></i></a>
193         
194     </div>
195 </div>
196 </div>
197 </div>
198 </div>
199 </section>
200 <!-- ***** About Area Ends ***** -->
201
202 @include("makanan")
203
204 <!-- ***** Chefs Area Starts ***** -->
```

- Selanjutnya kita buat model untuk makanan, dengan cara tuliskan diterminal seperti pada gambar

```
PS C:\xampp\htdocs\restaurant_klassy> php artisan make:model makanan -m
INFO Model [C:\xampp\htdocs\restaurant_klassy\app\Models\makanan.php] created successfully.
INFO Migration [C:\xampp\htdocs\restaurant_klassy\database\migrations\2024_01_30_011523_create_makanans_table.php] created successfully.
```

- Setelah selesai kita buka file migration makanan yang sudah dibuat sebelumnya, maka tambahkan script seperti pada gambar

```
public function up()
{
    Schema::create('makanans', function (Blueprint $table) {
        $table->id();
        $table->string("nama")->nullable();
        $table->string("harga")->nullable();
        $table->string("gambar")->nullable();
        $table->string("deskripsi")->nullable();
        $table->timestamps();
    });
}
```

- Setelah selesai maka lakukan migrasi database seperti pada gambar

```
PS C:\xampp\htdocs\restaurant_klassy> php artisan migrate
```

```
INFO Running migrations.
```

```
2024_01_30_011523_create_makanans_table ..... 31ms DONE
```

MEMASUKAN MENU MAKANAN KE DATABASE

- Langkah pertama kita masuk ke navbar.blade.php

SEBELUM

```
<li class="nav-item menu-items">
  <a class="nav-link" href="pages/forms/basic_elements.html">
    <span class="menu-icon">
      <i class="mdi mdi-playlist-play"></i>
    </span>
    <span class="menu-title">Makanan</span>
  </a>
</li>
```

SESUDAH DI GANTI

```
<li class="nav-item menu-items">
  <a class="nav-link" href="{{url('/menumakanan')}}">
    <span class="menu-icon">
      <i class="mdi mdi-playlist-play"></i>
    </span>
    <span class="menu-title">Menu Makanan</span>
  </a>
</li>
```

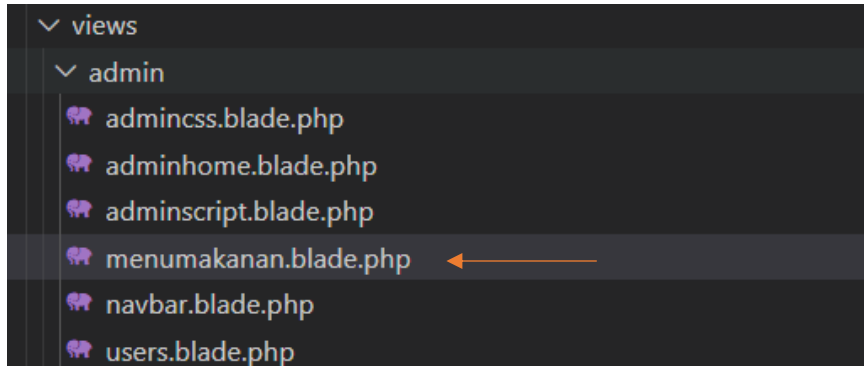

- Lalu buat rutanya di file web.blade.php seperti pada gambar

```
Route::get("/menumakanan", [AdminController::class, "menumakanan"]);
```

- Selanjutnya kita membuat function di file admincontroller.php dengan menambahkan seperti pada gambar

```
public function menumakanan()
{
    return view("admin.menumakanan");
}
```

- Sekarang kita buat file baru di dalam folder admin, beri nama menumakanan.blade.php sesuai yg dituju pada function yang sudah di buat

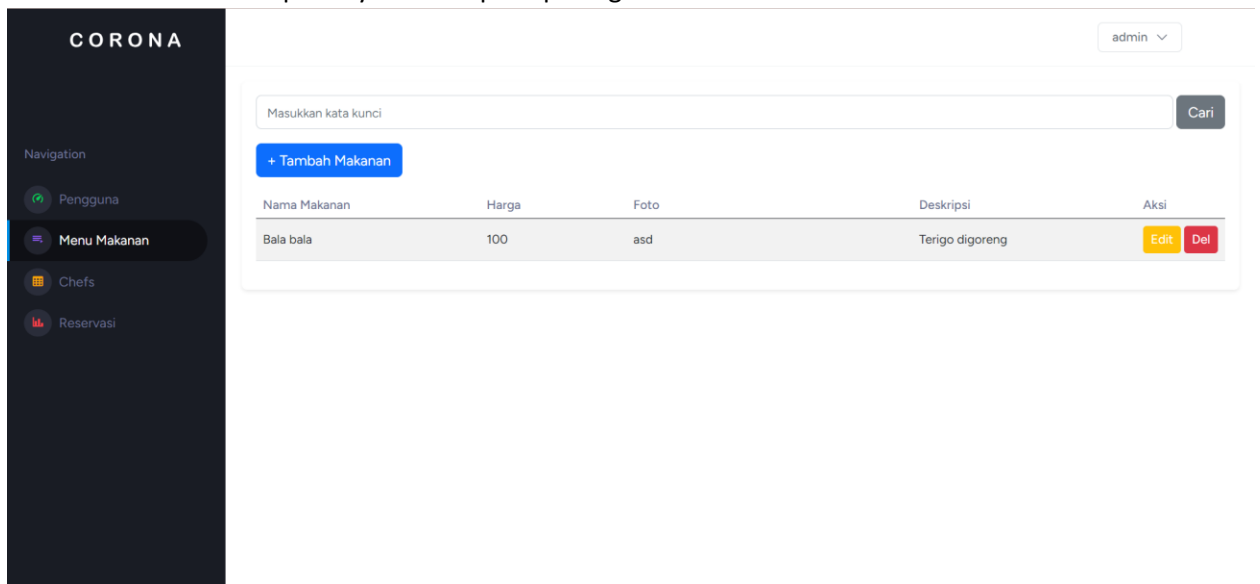

```
sources > views > admin > menukandangan.blade.php > html > body > div.container-scroller
1  <!DOCTYPE html>
2  <html lang="en">
3    <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width, initial-scale=1.0">
6      <meta http-equiv="X-UA-Compatible" content="ie=edge">
7      <title>Menu Makanan</title>
8
9    <x-app-layout>
10
11  </x-app-layout>
12
13    @include("admin.admincss")
14
15  </head>
16  <body>
17    <div class="container-scroller">
18
19    @include("admin.navbar")
20    <!doctype html>
21    <html lang="en">
22    <head>
23      <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.2.1/dist/css/bootstrap.min.css"
24        rel="stylesheet" integrity="sha384-iYQeCzEYfBkJA/T2uDLTpKwGzCiq6soy8tYaI1GyVh/UjpbCx/TYkiZhlZB6+fzT"
25        crossorigin="anonymous">
26    </head>
27    <body class="bg-light">
28
29      <main class="container">
30        <div class="my-3 p-3 bg-body rounded shadow-sm">
31          <!-- FORM PENCARIAN -->
32          <div class="pb-3">
33            <form class="d-flex" action="" method="get">
34              <input class="form-control me-1" type="search" name="katakunci" value="{{ Request::get('katakunci') }}"
35                placeholder="Masukkan kata kunci" aria-label="Search">
36              <button class="btn btn-secondary" type="submit">Cari</button>
37            </form>
38          </div>
39          <!-- TOMBOL TAMBAH DATA -->
40          <div class="pb-3">
41            <a href="{{url('/tambahmakanan')}}" class="btn btn-primary">+ Tambah Makanan</a>
42          </div>
43
44          <table class="table table-striped">
45            <thead>
46              <tr>
47                <th class="col-md-3">Nama Makanan</th>
48                <th class="col-md-2">Harga</th>
49                <th class="col-md-4">Foto</th>
50                <th class="col-md-3">Deskripsi</th>
51                <th class="col-md-2">Aksi</th>
52              </tr>
53            </thead>
54            <tbody>
55              <tr>
```

```

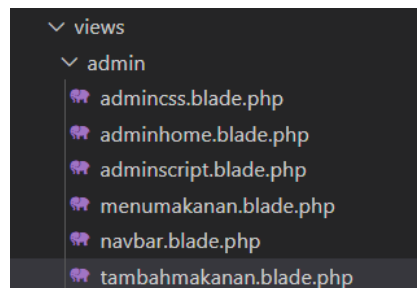

54         <tr>
55             <td>Bala bala</td>
56             <td>100</td>
57             <td>asd</td>
58             <td>Terigo digoreng</td>
59             <td>
60                 <a href="" class="btn btn-warning btn-sm">Edit</a>
61                 <a href="" class="btn btn-danger btn-sm">Del</a>
62             </td>
63         </tr>
64     </tbody>
65 </table>
66
67 </div>
68 </div>
69 </main>
70 <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.2.1/dist/js/bootstrap.bundle.min.js"
71 integrity="sha384-u10knCvxywV5kfmmNBILK2hRnQC3Pr17a+RTT6rIHI7NnikvZlHgTP00mMi466C8"
72 crossorigin="anonymous"></script>
73 </body>
74 </html>
75 <!-- container-scroller -->
76
77 @include("admin.adminscript")
78
79 </body>
80 </html>

```

11. Lalu kita cek untuk tampilannya akan seperti pada gambar

12. Selanjutnya kita buat file baru beri nama tambahmakanan.blade.php dan masukan script seperti pada gambar

```

resources > views > admin > tambahmakanan.blade.php > html > body.bg-light > main.container > form
1 <!doctype html>
2 <html lang="en">
3 <head>
4 <meta charset="utf-8">
5 <meta name="viewport" content="width=device-width, initial-scale=1">
6 <title>Tambah Makanan</title>
7 <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.2.1/dist/css/bootstrap.min.css" rel="stylesheet"
8 integrity="sha384-iYQeCzEYFbKjA/T2uDLTPkwGzCiq6soy8tYaI1GyVh/UjpbCx/TYkiZhlZB6+fzT" crossorigin="anonymous">
9 </head>
10 <body class="bg-light">
11 <main class="container">
12
13 <!-- START FORM -->
14 <form action='{{url('/uploadmakanan')}}' method='post' enctype="multipart/form-data">
15 @csrf
16
17 <div class="mb-3">
18 <a href='{{url('/menumakanan')}}' class="btn btn-primary"> <-Kembali</a>
19 </div>
20
21 <div class="my-3 p-3 bg-body rounded shadow-sm">
22 <div class="mb-3 row">
23 <label for="namamakanan" class="col-sm-2 col-form-label">Nama Makanan</label>
24 <div class="col-sm-10">
25 <input type="text" class="form-control" name='nama' id="nama" placeholder="Masukan Nama Makanan">
26 </div>
27 </div>
28 <div class="mb-3 row">
29 <label for="harga" class="col-sm-2 col-form-label">Harga</label>
30 <div class="col-sm-10">
31 <input type="number" class="form-control" name='harga' id="harga" placeholder="Masukan Harga">
32 </div>
33 </div>
34 <div class="mb-3 row">
35 <label for="formFile" class="col-sm-2 col-form-label">Upload Foto Makanan</label>
36 <div class="col-sm-10">
37 <input class="form-control" type="file" name="gambar" id="formFile">
38 </div>
39 </div>
40 <div class="mb-3 row">
41 <label for="deskripsi" class="col-sm-2 col-form-label">Deskripsi</label>
42 <div class="col-sm-10">
43 <input type="text" class="form-control" name='deskripsi' id="deskripsi" placeholder="Masukan Deskripsi Makanan">
44 </div>
45 </div>
46 <div class="mb-3 row">
47 <label for="jurusan" class="col-sm-2 col-form-label"></label>
48 <div class="col-sm-10"><button type="submit" class="btn btn-primary" name="submit">SIMPAN</button></div>
49 </div>
50 </form>
51 </div>
52 </main>
53 <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.2.1/dist/js/bootstrap.bundle.min.js"
54 integrity="sha384-u10knCvxywY5kfmNBILK2hRnQC3Pr17a+RTT6rIHI7NnikvZlHgTP00mMi466C8" crossorigin="anonymous"></script>
55 </body>
56 </html>

```

13. Lalu tambahkan script di bawah ini pada file web.php

```

Route::get("/tambahmakanan", [AdminController::class, "tambahmakanan"]);

23 Route::post("/uploadmakanan", [AdminController::class, "uploadmakanan"]);
24

```

14. Dan tambahkan juga pada file admincontroller function di bawah untuk memindahkan halaman

```
public function tambahmakanan()
{
    return view("admin.tambahmakanan");
}
```

15. Tambahkan juga pada file admincontroller function untuk uploadmakanan seperti pada gambar

```
public function uploadmakanan(Request $request)
{
    $data = new makanan;

    $gambar=$request->gambar;

    $imagename =time().'.'.$gambar->getClientOriginalExtension();
    $request->gambar->move('foodimage',$imagename);

    $data->gambar=$imagename;

    $data->nama=$request->nama;
    $data->harga=$request->harga;
    $data->deskripsi=$request->deskripsi;

    $data->save();

    return redirect()->back();
}
```

16. Sekarang kita buka halaman tambahmakanan maka akan seperti pada gambar

The screenshot shows a web browser window with the address bar displaying 'localhost:8000/tambahmakanan'. Below the address bar is a blue button labeled '<-Kembali'. The main content area contains a form with the following elements:

- A blue button labeled '<-Kembali'.
- A form with four input fields:
 - 'Nama Makanan' with placeholder text 'Masukan Nama Makanan'.
 - 'Harga' with placeholder text 'Masukan Harga'.
 - 'Upload Foto Makanan' with a 'Choose File' button and the text 'No file chosen'.
 - 'Deskripsi' with placeholder text 'Masukan Deskripsi Makanan'.
- A blue button labeled 'SIMPAN' at the bottom of the form.

17. Lalu kita coba isi data tersebut dan simpan, maka pada table makanan akan masuk data seperti pada gambar

Showing rows 0 - 4 (5 total, Query took 0.0003 seconds.)

`SELECT * FROM `makanans``

☐ Profiling [[Edit inline](#)] [[Edit](#)] [[Explain SQL](#)] [[Create PHP code](#)] [[Refresh](#)]

☐ Show all | Number of rows: | Filter rows: | Sort by key:

MENAMPILKAN DATA MAKANAN DARI DATABASE KE TAMPILAN HOME

18. Pertama kita buka HomeController.php lalu tuliskan script seperti pada gambar, dan disimpan di bagian atas

```
use Illuminate\Http\Request;
use Illuminate\Support\Facades\Auth;
use App\Models\makanan;
```

19. Masih di dalam file HomeController.php, kita tambahkan pada function index() dan function redirects, script seperti pada gambar

```
public function index()
{
    $data=makanan::all();
    return view("home",compact("data"));
}
```

```
public function redirects()
{
    $data=makanan::all();
    $usertype= Auth::user()->usertype;

    if($usertype=='1')
    {
        return view("admin.adminhome");
    }
    else
    {
        return view("home",compact("data"));
    }
}
```

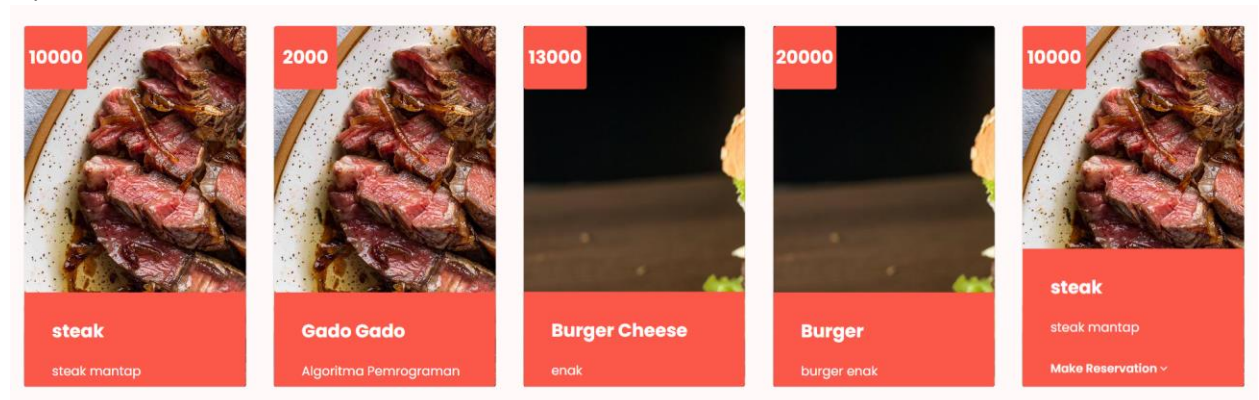

20. Lalu kita buka file makanan.blade.php, hapus semua script dan ganti dengan script seperti pada gambar

```

2 <section class="section" id="menu">
3   <div class="container">
4     <div class="row">
5       <div class="col-lg-4">
6         <div class="section-heading">
7           <h6>Our Menu</h6>
8           <h2>Our selection of cakes with quality taste</h2>
9         </div>
10      </div>
11    </div>
12  </div>
13  <div class="menu-item-carousel">
14    <div class="col-lg-12">
15      <div class="owl-menu-item owl-carousel">
16        @foreach ($data as $data)
17
18          <div class="item">
19            <div style="background-image: url('/foodimage/{{ $data->gambar }}');" class='card'>
20              <div class="price"><h6>{{ $data->harga }}</h6></div>
21              <div class='info'>
22                <h1 class='title'>{{ $data->nama }}</h1>
23                <p class='description'>{{ $data->deskripsi }}</p>
24                <div class="main-text-button">
25                  <div class="scroll-to-section"><a href="#reservation">Make Reservation
26                    <i class="fa fa-angle-down"></i></a></div>
27                </div>
28              </div>
29            </div>
30          </div>
31        @endforeach
32      </div>
33    </div>
34  </div>
35 </div>
36 </div>
37 </section>

```

21. Sekarang kita cek dibagian home, maka akan tampil di menu makanan sesuai data yg sudah di input

MEMBUAT AKSI DELETE PADA MENU MAKANAN MELALUI ADMIN

22. buka halaman menumakanan.blade.php, lalu tambahkan script seperti pada gambar

```

1  <!DOCTYPE html>
2  <html lang="en">
3    <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width, initial-scale=1.0">
6      <meta http-equiv="X-UA-Compatible" content="ie=edge">
7      <title>Menu Makanan</title>
8
9    <x-app-layout>
10
11  </x-app-layout>

35                      placeholder="Masukkan kata kunci" aria-label="Search">
36                    <button class="btn btn-secondary" type="submit">Cari</button>
37                  </form>
38                </div>
39                <!-- TOMBOL TAMBAH DATA -->
40                <div class="pb-3">
41                  <a href="{{url('/tambahmakanan')}}" class="btn btn-primary">+ Tambah Makanan</a>
42                </div>
43
44                <table class="table table-striped">
45                  <thead>
46                    <tr>
47                      <th class="col-md-3">Nama Makanan</th>
48                      <th class="col-md-2">Harga</th>
49                      <th class="col-md-4">Foto</th>
50                      <th class="col-md-3">Deskripsi</th>
51                      <th class="col-md-2">Aksi</th>
52                    </tr>
53                  </thead>
54                  <tbody>
55                    @foreach ($data as $data)

```

```

58         <tr>
59             <td>{{ $data->nama }}</td>
60             <td>{{ $data->harga }}</td>
61             <td>{{ $data->deskripsi }}</td>
62             <td></td>
63             <td>
64                 <a href="" class="btn btn-warning btn-sm">Edit</a>
65                 <a href="{{ url('deletemenu', $data->id) }}" class="btn btn-danger btn-sm">Del</a>
66             </td>
67         </tr>
68     @endforeach
69 </tbody>
70 </table>
71 </div>
72 </div>
73 </main>
74 <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.2.1/dist/js/bootstrap.bundle.min.js"
75 integrity="sha384-u10knCvxxwvY5kfmNBILK2hRnQC3Pr17a+RTT6rIHI7NnikvZlHgTP00mMi466C8"
76 crossorigin="anonymous"></script>
77 </body>
78 </html>
79 @include("admin.adminscript")
80 </body>
81 </html>
82 </html>

```

23. Setelah selesai, kita buka file admincontroller.php, pada function menu makanan, tambahkan scripts seperti dibawah ini

SEBELUM

```

public function menumakanan()
{
    return view("admin.menumakanan");
}

```

SESUDAH

```

public function menumakanan()
{
    $data=makanan::all();
    return view("admin.menumakanan",compact("data"));
}

```

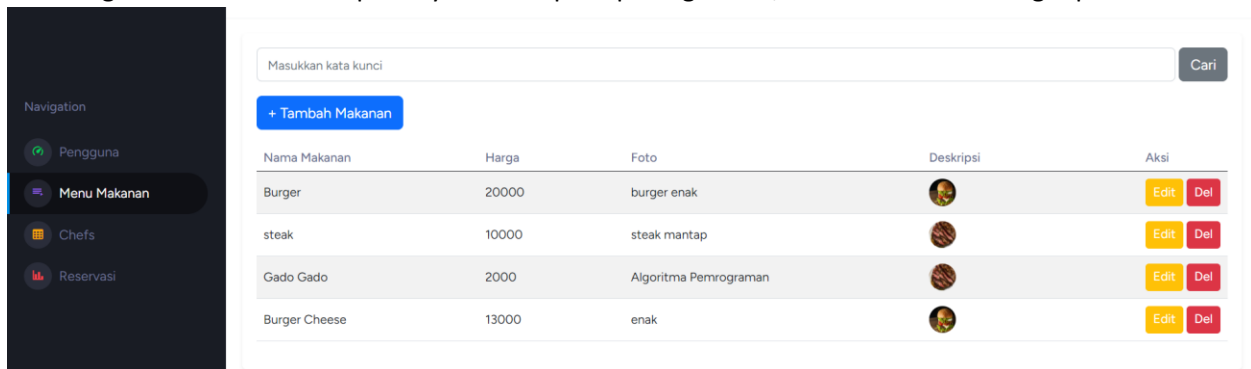

24. Tambahkan juga function delet pada admincontroller

```
public function deletemenu($id)
{
    $data=makanan::find($id);
    $data->delete();
    return redirect()->back()->with('success','Data berhasil dihapus!');
}
```

25. Tambahkan script pada file web.php seperti pada gambar

```
Route::get("/deletemenu/{id}", [AdminController::class, "deletemenu"]);
```

26. Sekarang kita buka maka tampilannya akan seperti pada gambar, dan coba untuk menghapus

UPDATE DATA DARI HALAMAN ADMIN

27. Buka file menumakanan.blade.php, pada bagian edit, tambahkan script seperti pada gambar

```
<a href="{{url('/editmakanan', $data->id)}}" class="btn btn-warning btn-sm">Edit</a>
```

28. Lalu buka file web.php lalu tambahkan script seperti pada gambar

```
Route::get("/editmakanan/{id}", [AdminController::class, "editmakanan"]);
```

```
Route::post("/edit/{id}", [AdminController::class, "edit"]);
```

29. Buka admincontroller lalu buat function dengan nama editmakanan dan edit, seperti pada gambar

```

public function editmakanan($id)
{
    $data=makanan::find($id);
    return view("admin.editview",compact("data"));
}

public function edit(Request $request, $id)
{
    $data=makanan::find($id);

    $gambar=$request->gambar;

    $imagename =time().'.'.$gambar->getClientOriginalExtension();
    $request->gambar->move('foodimage',$imagename);

    $data->gambar=$imagename;

    $data->nama=$request->nama;
    $data->harga=$request->harga;
    $data->deskripsi=$request->deskripsi;

    $data->save();

    return redirect()->back();
}

```

30. Lalu buat file baru dengan nama editview.blade.php di dalam folder admin

 editview.blade.php

```

<!doctype html>
<html lang="en">
  <head>
    <meta charset="utf-8">
    <meta name="viewport" content="width=device-width, initial-scale=1">
    <title>Tambah Makanan</title>
    <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.2.1/dist/css/bootstrap.min.css" rel="stylesheet"
    integrity="sha384-iYQeCzEYFbkJA/T2uDLTpkwGzCi6soy8tYaI1GyVh/UjpbCx/TYkiZhlZB6+fzT" crossorigin="anonymous">
  </head>
  <body class="bg-light">
    <main class="container">

      <!-- START FORM -->
      <form action='{{url('/edit',$data->id)}}' method='post' enctype="multipart/form-data">
        @csrf

        <div class="mb-3">
          <a href='{{url('/menumakanan')}}' class="btn btn-primary"> <-Kembali</a>
        </div>

        <div class="my-3 p-3 bg-body rounded shadow-sm">
          <div class="mb-3 row">
            <label for="namamakanan" class="col-sm-2 col-form-label">Nama Makanan</label>

              placeholder="Masukan Harga" required>
            </div>
          </div>

          <div class="mb-3 row">
            <label for="formFile" class="col-sm-2 col-form-label">Upload Foto Makanan</label>
            <div class="col-sm-10">
              <input class="form-control" type="file" name="gambar" id="formFile">
              <img height="200" width="200" src= "/foodimage/{{ $data->gambar }}">
            </div>
          </div>

          <div class="mb-3 row">
            <label for="deskripsi" class="col-sm-2 col-form-label">Deskripsi</label>
            <div class="col-sm-10">
              <input type="text" class="form-control" name='deskripsi' id="deskripsi" value="{{ $data->deskripsi }}"
              placeholder="Masukan Deskripsi Makanan" required>
            </div>
          </div>

          <div class="mb-3 row">
            <label for="jurusan" class="col-sm-2 col-form-label"></label>
            <div class="col-sm-10"><button type="submit" class="btn btn-primary" name="submit">SIMPAN</button></div>
          </div>
        </form>
      </div>

    </main>
    <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.2.1/dist/js/bootstrap.bundle.min.js"
    integrity="sha384-u10knCvxywY5kfmNBILK2hRnQC3Pr17a+RTT6rIHI7NnikvzLHgTP00mMi466C8" crossorigin="anonymous"></script>
  </body>
</html>

```

31. Setelah selesai langsung di coba, maka tampilannya akan seperti pada gambar

localhost:8000/editmakanan/5

Kembali

Nama Makanan: Burger Cheese

Harga: 13000

Upload Foto Makanan: Choose File No file chosen

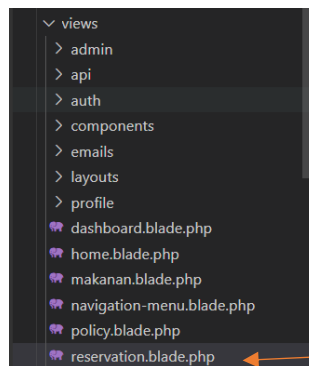

Deskripsi: enak

SIMPAN

MEMBUAT FUNGSI RESERVASI

32. Buat file baru pada folder views dan beri nama reservation.blade.php

33. Buka file [home.blade.php](#), cut bagian reservation, dan paste ke dalam file reservation.blade.php. maka isi script file reservation akan seperti pada gambar.

```

1  <!-- ***** Reservation Us Area Starts ***** -->
2  <section class="section" id="reservation">
3      <div class="container">
4          <div class="row">

52                             </fieldset>
53                         </div>
54                         <div class="col-md-6 col-sm-12">
55                             <fieldset>

```

```

56         <select value="number-guests" name="number-guests" id="number-guests">
57             <option value="number-guests">Number Of Guests</option>
58             <option name="1" id="1">1</option>
59             <option name="2" id="2">2</option>
60             <option name="3" id="3">3</option>
61             <option name="4" id="4">4</option>
62             <option name="5" id="5">5</option>
63             <option name="6" id="6">6</option>
64             <option name="7" id="7">7</option>
65             <option name="8" id="8">8</option>
66             <option name="9" id="9">9</option>
67             <option name="10" id="10">10</option>
68             <option name="11" id="11">11</option>
69             <option name="12" id="12">12</option>
70         </select>
71     </fieldset>
72 </div>
73 <div class="col-lg-6">
74     <div id="filterDate2">
75         <div class="input-group date" data-date-format="dd/mm/yyyy">
76             <input name="date" id="date" type="text" class="form-control" placeholder="dd/mm/yyyy">
77             <div class="input-group-addon">
78                 <span class="glyphicon glyphicon-th"></span>
79             </div>
80         </div>
81     </div>
82 </div>
83 <div class="col-md-6 col-sm-12">
84     <fieldset>
85         <select value="time" name="time" id="time">
86             <option value="time">Time</option>
87             <option name="Breakfast" id="Breakfast">Breakfast</option>
88             <option name="Lunch" id="Lunch">Lunch</option>
89             <option name="Dinner" id="Dinner">Dinner</option>
90         </select>
91     </fieldset>
92 </div>
93 <div class="col-lg-12">
94     <fieldset>
95         <textarea name="message" rows="6" id="message" placeholder="Message" required=""></textarea>
96     </fieldset>
97 </div>
98 <div class="col-lg-12">
99     <fieldset>
100         <button type="submit" id="form-submit" class="main-button-icon">Make A Reservation</button>
101     </fieldset>
102 </div>
103 </div>
104 </form>
105 </div>
106 </div>
107 </div>
108 </div>
109 </section>

```

34. Setelah selesai, sekarang kita buka file home.blade.php tambahkan script seperti dibawah ini untuk memunculkan tampilan reservation

```

270 </section>
271 <!-- ***** Chefs Area Ends ***** -->
272 @include(["reservation"])
273
274 <!-- ***** Menu Area Starts ***** -->

```

35. Buka file reservation.blade.php dan tambahkan @csrf pada bagian di atas judul seperti pada gambar

```
33 <form id="contact" action="" method="post">
34
35 @csrf ←
36
37 <div class="row">
38   <div class="col-lg-12">
39     <h4>Table Reservation</h4>
40   </div>
```

36. Sekarang kita akan merubah tampilan untuk pemesan tamu. Kita buka file reservation.blade.php lalu hapus bagian Number of Guest.

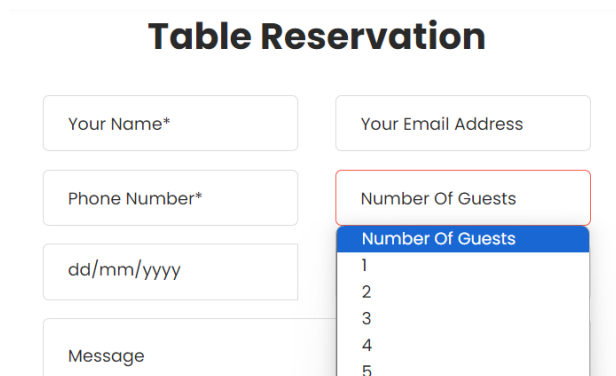

SEBELUM

```
58 <fieldset>
59   <select value="number-guests" name="number-guests" id="number-guests">
60     <option value="number-guests">Number Of Guests</option>
61     <option name="1" id="1">1</option>
62     <option name="2" id="2">2</option>
63     <option name="3" id="3">3</option>
64     <option name="4" id="4">4</option>
65     <option name="5" id="5">5</option>
66     <option name="6" id="6">6</option>
67     <option name="7" id="7">7</option>
68     <option name="8" id="8">8</option>
69     <option name="9" id="9">9</option>
70     <option name="10" id="10">10</option>
71     <option name="11" id="11">11</option>
72     <option name="12" id="12">12</option>
73   </select>
74 </fieldset>
```

DIGANTI MENJADI

```
<input type="number" name="guest" placeholder="Number of Guest">
```

TAMPILAN SEBELUMNYA

SESUDAH

37. Kita akan merubah juga pada tampilan jam pemesanannya. Hapus pada bagian jam nya seperti pada gambar dan diganti

SEBELUM

```
71 <fieldset>
72 <select value="time" name="time" id="time">
73 <option value="time">Time</option>
74 <option name="Breakfast" id="Breakfast">Breakfast</option>
75 <option name="Lunch" id="Lunch">Lunch</option>
76 <option name="Dinner" id="Dinner">Dinner</option>
77 </select>
78 </fieldset>
```

SEDUDAH

```
<input type="time" name="time">
```

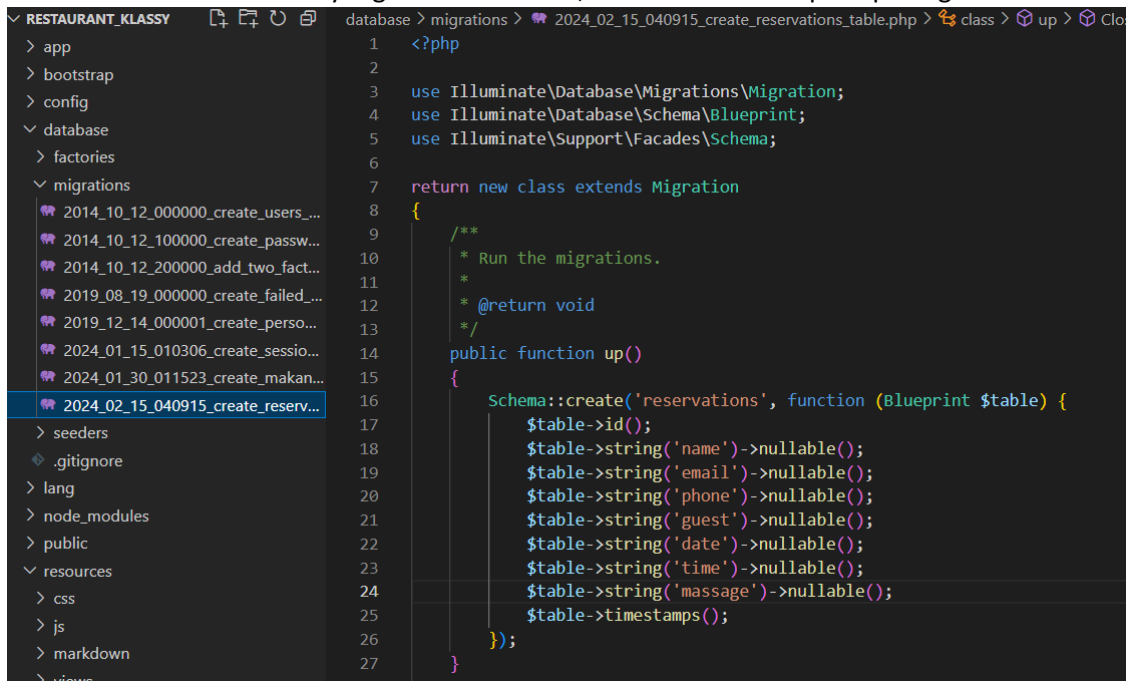

38. Maka tampilannya akan seperti pada gambar

39. Selanjutnya kita buat model dengan menuliskan perintah seperti pada gambar

```
PS C:\xampp\htdocs\restaurant_klassy> php artisan make:model Reservation -m
INFO Model [C:\xampp\htdocs\restaurant_klassy\app\Models\Reservation.php] created successfully.
INFO Migration [C:\xampp\htdocs\restaurant_klassy\database\Migrations\2024_02_15_040915_create_reservations_table.php] created successfully.
```

40. Buka database reservation yang tadi sudah buat, lalu tambahkan seperti pada gambar

```
1 <?php
2
3 use Illuminate\Database\Migrations\Migration;
4 use Illuminate\Database\Schema\Blueprint;
5 use Illuminate\Support\Facades\Schema;
6
7 return new class extends Migration
8 {
9     /**
10      * Run the migrations.
11      * @return void
12      */
13     public function up()
14     {
15         Schema::create('reservations', function (Blueprint $table) {
16             $table->id();
17             $table->string('name')->nullable();
18             $table->string('email')->nullable();
19             $table->string('phone')->nullable();
20             $table->string('guest')->nullable();
21             $table->string('date')->nullable();
22             $table->string('time')->nullable();
23             $table->string('message')->nullable();
24             $table->timestamps();
25         });
26     }
27 }
```

41. Lakukan php artisan migrate pada terminal untuk mengupdate isi tablenya

```
PS C:\xampp\htdocs\restaurant_klassy> php artisan migrate
INFO Running migrations.
2024_02_15_040915_create_reservations_table ..... 35ms DONE
```

42. Tambahkan script pada file reservation seperti pada gambar

SEBELUM

```
31 <div class="col-lg-6">
32 <div class="contact-form">
33 <form id="contact" action="" method="post">
34
35 @csrf
36
```

SESUDAH

```
31 <div class="col-lg-6">
32 <div class="contact-form">
33 <form id="contact" action="{{url('reservation')}}" method="post">
34
35 @csrf
36
```

43. Buka file web.php tambahkan rute untuk reservation

```
Route::post("/reservation", [AdminController::class, "reservation"]);
```

44. Lalu buatlah function reservation pada file admincontroller

```
use App\Models\reservation;
```

```
public function reservation(Request $request)
{
    $data = new reservation;

    $data->name=$request->name;
    $data->email=$request->email;
    $data->phone=$request->phone;
    $data->guest=$request->guest;
    $data->date=$request->date;
    $data->time=$request->time;
    $data->massage=$request->massage;

    $data->save();

    return redirect()->back();
}
```

45. Sekarang kita coba input pada form reservasi, jika berhasil maka akan tampil di database table reservasi seperti pada gambar

<div><div><div><div></div><div></div></div><div><div></div><div></div></div></div><div></div></div>											id	name	email	phone	guest	date	time	message	created_at	updated_at
<div><div><div></div><div></div></div><div><div></div><div></div></div></div> <div><div>Edit</div><div>Copy</div><div>Delete</div></div>	1	asdsa	smk@bppi.sch.id	0225943340	3	29.03.2024	12:29	NULL	2024-02-15 05:28:12	2024-02-15 05:28:12										

46. Selanjutnya kita buat file baru di dalam folder admin , bernama adminreservation.blade.php

47. Buka file navbar.blade.php, beri url untuk masuk ke halaman reservasi

SEBELUM

```
<a class="nav-link" href="pages/charts/chartjs.html">
  <span class="menu-icon">
    <i class="mdi mdi-chart-bar"></i>
  </span>
  <span class="menu-title">Reservasi</span>
</a>
```

SESUDAH

```
<a class="nav-link" href="{{url('/viewreservasi')}}">
  <span class="menu-icon">
    <i class="mdi mdi-chart-bar"></i>
  </span>
  <span class="menu-title">Reservasi</span>
</a>
```

48. Lalu buat rute di file web.php

```
Route::get("/viewreservasi", [AdminController::class, "viewreservasi"]);
```

49. Selanjutnya buat function untuk viewreservation

```
public function viewreservasi()
{
    $data=reservation::all();
    return view("admin.adminreservation",compact("data"));
}
```

50. Sekarang kita buat tampilan untuk adminreservation

```
1  <!DOCTYPE html>
2  <html lang="en">
3  |   <head>
4  |       <meta charset="UTF-8">
5  |       <meta name="viewport" content="width=device-width, initial-scale=1.0">
6  |       <meta http-equiv="X-UA-Compatible" content="ie=edge">
7  |       <title>Reservasi</title>
8  |
9  |   <x-app-layout>
10 |
11 | </x-app-layout>
12 |
13 |     @include("admin.admincss")
14 |
15 |   </head>
16 |   <body>
17 |       <div class="container-scroller">
18 |
19 |         @include("admin.navbar")
20 |         <!doctype html>
21 |         <html lang="en">
22 |         <head>
23 |             <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.2.1/dist/css/bootstrap.min.css"
24 |                 rel="stylesheet" integrity="sha384-iYQeCzEYFbkjA/T2uDLtpkwGzCiq6soy8tYaI1GyVh/UjpbCx/TYkiZhlZB6+fzT"
25 |                 crossorigin="anonymous">
26 |         </head>
27 |         <body class="bg-light">
28 |             <main class="container">
29 |
30 |                 <div class="my-3 p-3 bg-body rounded shadow-sm">
31 |                     <!-- FORM PENCARIAN -->
32 |                     <div class="pb-3">
33 |                         <form class="d-flex" action="" method="get">
34 |                             <input class="form-control me-1" type="search" name="katakunci" value="{{ Request::get('katakunci') }}"
35 |                                 placeholder="Masukkan kata kunci" aria-label="Search">
36 |                             <button class="btn btn-secondary" type="submit">Cari</button>
37 |                         </form>
38 |                     </div>
39 |                     <!-- TOMBOL TAMBAH DATA -->
40 |                     <div class="pb-3">
41 |                         <a href="{{url('/tambahmakanan')}}" class="btn btn-primary">+ Tambah Reservasi</a>
42 |                     </div>
43 |
44 |                     <table class="table table-striped">
45 |                         <thead>
46 |                             <tr>
47 |                                 <th class="col-md-2">Nama</th>
48 |                                 <th class="col-md-2">Email</th>
49 |                                 <th class="col-md-2">No Telepon</th>
50 |                                 <th class="col-md-2">Jumlah Tamu</th>
51 |                                 <th class="col-md-2">Tanggal</th>
52 |                                 <th class="col-md-2">Jam</th>
53 |                                 <th class="col-md-3">Message</th>
54 |                             </tr>
55 |                         </thead>
56 |                         <tbody>
```

```

56     @foreach ($data as $data)
57     <tr>
58         <td>{{$data->name}}</td>
59         <td>{{$data->email}}</td>
60         <td>{{$data->phone}}</td>
61         <td>{{$data->guest}}</td>
62         <td>{{$data->date}}</td>
63         <td>{{$data->time}}</td>
64         <td>{{$data->message}}</td>
65     </td>
66         <a href="{{url('/editmakanan', $data->id)}}" class="btn btn-warning btn-sm">Edit</a>
67         <a href="{{url('/deletemakanan', $data->id)}}" class="btn btn-danger btn-sm">Del</a>
68     </td>
69 </tr>
70 @endforeach
71 </tbody>
72 </table>
73 </div>
74 </div>
75 </main>
76 <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.2.1/dist/js/bootstrap.bundle.min.js"
77 integrity="sha384-u10knCvxwVY5kfmNBILK2hRnQC3Pr17a+RTT6rIHI7NnikvbZ1HgTPOmMi466C8"
78 crossorigin="anonymous"></script>
79 </body>
80 </html>
81 @include("admin.adminscript")
82 </body>
83 </html>

```

51. Sekarang coba kita lihat tampilannya maka akan seperti pada gambar
